MARKET GAP

The Market Is Fragmented.

Traders, gamers, and everyday users are forced to jump between platforms just to access basic financial tools.

Fragmented Platforms

Separate tools for trading signals, DeFi, gaming rewards, and payments. Each costs time and fees.

Institutions Win

Retail traders have no access to algo-grade signals. Institutions pay \$500+/month for what ATH provides on-chain.

Gaming Has No Real Yield

GameFi tokens lack financial utility. Earnings can't be spent or traded without leaving the ecosystem.

No Cross-Utility Token

No single Solana token today combines AI trading + GameFi + real-world payments in one seamless system.

OUR ANSWER

One Token. Zero Fragmentation.

ATH eliminates platform fragmentation with a single utility token powering three high-demand verticals — natively on Solana.

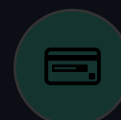

AI TRADING

Institutional-grade algo signals on-chain. Users subscribe with ATH. 30% of fees permanently burned.

GAMEFI

Play-to-earn tournaments & missions. ATH rewards earned in-game can immediately fund AI signals or payments.

PAYMENTS

Spend ATH in real-world commerce via Whish Money. Crypto-to-fiat payments — global merchant acceptance.

Every utility burns ATH → every new user increases scarcity → every holder benefits

TAM / SAM / SOM

A Trillion-Dollar Convergence.

ATH sits at the intersection of three of the fastest growing markets in global finance.

Solana Ecosystem

Total value within the Solana ecosystem in 2026 bull cycle

UTILITY 1

AI-Powered Trading, On-Chain. \$500+

/month charged by centralized algo signal platforms.
ATH delivers this on-chain, subscribed in ATH.

 30% of all AI trading fees are permanently burned
Every new subscriber reduces total supply

HOW IT WORKS

- 01 User subscribes to AI signal package using ATH tokens
- 02 Proprietary algorithms analyze on-chain data & order flow
- 03 30% of all subscription fees are permanently burned
- 04 Premium tiers unlock automated execution & multi-asset coverage

Play. Earn. Spend. Repeat.

GAMEFI

Play-to-Earn Ecosystem

On-chain tournaments and missions generate real ATH rewards. The game loop reinforces token demand:

- Earn ATH completing in-game challenges & tournaments
- In-app purchases paid in ATH (20% permanently burned)
- On-chain leaderboards with competitive staking rewards
- GameFi earnings usable directly for AI signals or payments

PAYMENTS

Real-World Crypto Payments

Powered by Wish Money — a licensed crypto-to-fiat payment processor active across MENA and beyond:

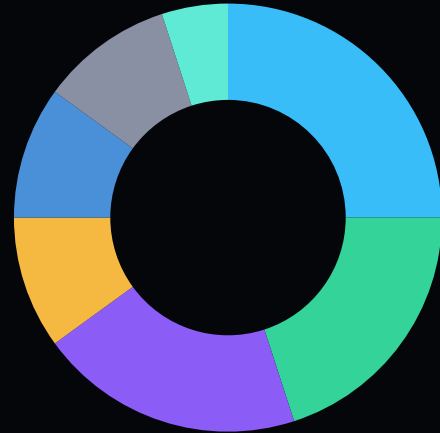

- Spend ATH at real merchants via Wish Money integration
- 15% of payment fees permanently burned per transaction
- Instant fiat settlement for merchants — zero crypto risk
- Positions ATH as the first Solana payment utility token

TOKEN DESIGN

Designed for Long-Term Value.

Day 1

SUPPLY CONTROL

Every Transaction Burns ATH.

Three independent mechanisms continuously reduce circulating supply — creating structural upward pressure on price.

TOKEN BURN

AI Trading fees	30% burned
GameFi purchases	20% burned
AI signal subscriptions	10% burned
Payment tx fees	15% burned

STAKING APY

1 Month lock	5% APY
3 Month lock	12% APY
6 Month lock	20% APY
12 Month lock	35% APY

BUYBACK & BURN

AI Trading revenue	30% buyback
GameFi fees	20% buyback
Payment processing	25% buyback
Active from	Day 1 TGE

More users = More burning = More scarcity = More value for every holder

5-MONTH LAUNCH PLAN

From Seed to TGE in 5 Months.

MONTH 1

SEED ROUND

- 50–100 trusted investors
- SAFT agreements signed
- KYC complete
- Multisig treasury live

MONTH 2

PRIVATE ROUND 1

- "Seed Sold Out" publish
- Private Round 1 opens
- Full team publicly doxxed
- Smart contract vesting deployed

MONTHS 3

PRIVATE ROUND 2

- 3 rounds open sequentially
- Aggressive marketing
- Anti-dump mechanisms live
- Last major round before final push

MONTHS 4

PRIVATE ROUND 2

- Smart contract audit
- Raydium pool prep (\$500K+)
- AI platform testing
- CEX listing conversations

MONTH 5

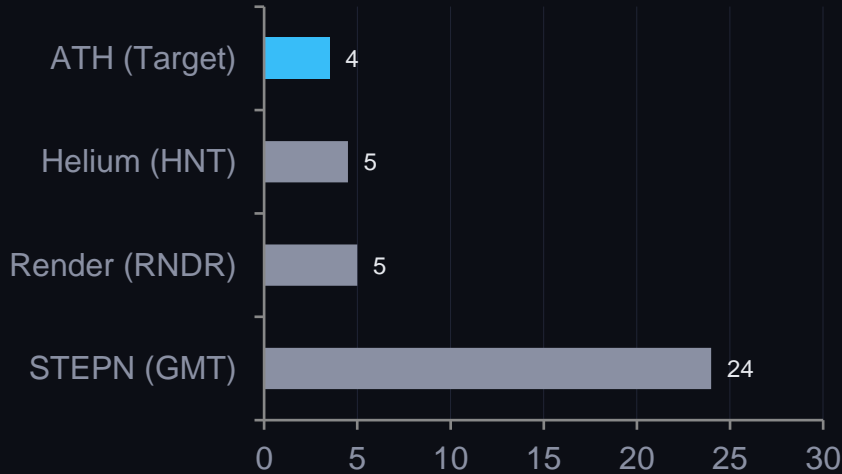

BUILD PHASE
TGE & LISTING

- Marketing final push
- All smart contracts audited
- Liquidity locked on Raydium
- Minimum 15,000 community
- AI Trading platform LIVE
- List at \$0.040 on Raydium
- Buyback & Burn activates
- Minimum \$500K USDC

MARKET BENCHMARKING

ATH vs The Solana Benchmarks.

Peak FDV Comparison (\$B)

Metric	STEPN	Render	Helium	ATH
Chain	Solana	Solana	Solana	Solana ★
Supply	6B	536M	223M	3B
Seed Price	\$0.005	\$0.025	\$0.250	\$0.006
TGE Price	\$0.136	\$0.050	\$0.500	\$0.040
Utilities	2	1	1	3 ★★★
Revenue Streams	1	1	1	3 ★★★
Real Payments	✗	✗	✗	✓★

ATH UNIQUE ADVANTAGE

ATH is the ONLY Solana token combining AI Trading + GameFi + Real-World Payments in one ecosystem with 3 burn mechanisms.

LEADERSHIP

The People Behind ATH.

ATH is built by experienced professionals spanning blockchain development, algorithmic trading, financial management, and global marketing.

INVESTOR PROTECTION

Built on Verifiable Trust.

LEGAL & COMPLIANCE

- SAFT agreement signed by every investor
- KYC verification before token distribution
- UAE / Singapore legal jurisdiction
- Restricted jurisdictions blocked at system level
- No ROI promises in any marketing material

SECURITY

- 3-of-5 multisig wallet for all treasury funds
- Smart contract audit pre-launch (reputable firm)
- Smart contract enforced vesting — cannot be changed
- Anti-phishing domain monitoring throughout presale
- KYC data via professional third-party provider

TRANSPARENCY

- Full vesting schedule published before Seed opens
- Liquidity locked on Raydium for 12+ months
- Named, doxxed team — zero anonymous members
- Regular product progress updates to community
- All partnerships announced only when signed
